PRODUCT DETAILS

We developed a Portable T-Sort Powered Belt Conveyor with a mating portable gravity section designed for mobility. This heavy duty unit is remarkably easy to move, and offers a simple and effective means to handle difficult to convey products in sorting, loading, or unloading applications. The UHMW lined Chute provides a low friction surface at interface points, allowing operators to easily transfer these challenging items on or off the adjoining surfaces. The unit is driven with a 2 HP reversible motorized pulley that uses 115V, 1ph power. Its 20 ft long power cord is supplied with a twist lock plug that stays put. This conveyor is a multi-use unit that is easily deployed for whatever your special use needs might be.
